## MATH1115 - Functions/Trigonometry

$\left.\begin{array}{|l|l|}\hline \text { Credits: } & \text { 4(4/0/0) } \\ \hline \text { Description: } & \begin{array}{l}\text { Meets MnTC Goal Areas } 2 \text { and 4. This course includes trigonometric functions, right triangle } \\ \text { trigonometry, radian measure and circular functions, identities, equations, inverse functions, } \\ \text { oblique triangles, complex numbers, vectors, polar coordinates and conic sections. }\end{array} \\ \hline \text { Prerequisites: } & \text { - MATH1114 } \\ \hline \text { Corequisites: } & \begin{array}{l}\text { Pre/Corequisites*: }\end{array} \\ \hline \text { Competencies: } & \begin{array}{l}\text { 1. Use the circular method to define trigonometric functions. } \\ \text { 2. Use the right triangle method to define trigonometric functions. } \\ \text { 3. Analyze the characteristics of trigonometric functions, their inverses and graphs. } \\ \text { 4. Solve trigonometric equations. } \\ \text { 5. Identify and prove trigonometric identities. } \\ \text { 6. Use trigonometric identities to evaluate functions and simplify expressions. } \\ \text { 7. Solve applications involving trigonometric concepts. }\end{array} \\ \hline \text { 8. Explore the Law of Cosines and the Law of Sines. } \\ \text { 9. Apply vector concepts to find solutions in the plane and in three dimensional space. } \\ \text { 10. Explore complex numbers and their trigonometric form. } \\ \text { 11. Analyze the characteristics of parabolas, ellipses, and hyperbolas. } \\ \text { 12. Explore polar coordinates, equations and their graphs. }\end{array}\right\}$
*Can be taking as a Prerequisite or Corequisite.
