

ADMM2500 - Human Disease Applications for Administrative Health Professionals

Credits:	3 (2/1/0)
Description:	<p>Knowledge of human diseases is crucial for administrative health personnel to efficiently and accurately assist health care providers and staff with the many administrative tasks associated with health care treatment. This course focuses on common signs and symptoms of disease affecting the human body including associated procedures, diagnostic testing and treatment. Recognition of emergent and urgent symptoms is addressed. Knowledge of the many aspects of human disease is needed to effectively provide health care support services and interact with patients presenting electronically, verbally or in person with administrative health personnel. Practical applications in communication, documentation and billing for the administrative medical office are emphasized.</p>
Prerequisites:	<ul style="list-style-type: none"> • HLTH1110
Corequisites:	<ul style="list-style-type: none"> • HLTH1110
