

## BLDG1120 - Construction Estimating I

Credits:	2 (1/1/0)
Description:	This course covers the mathematical procedures used in material estimating and completing quantity takeoffs for building projects.
Prerequisites:	
Corequisites:	
Pre/Corequisites <sup>*</sup> :	
Competencies:	<ol> <li>Calculate material quantities for residential concrete foundations.</li> <li>Calculate material quantities for rough framing materials.</li> <li>Calculate material quantities for exterior finishes.</li> <li>Calculate material quantities for interior finishes.</li> <li>Calculate labor rates and time for completing residential construction projects.</li> <li>Demonstrate the ability to put together a professional proposal packet for a potential customer.</li> </ol>
MnTC goal areas:	None

\*Can be taking as a Prerequisite or Corequisite.
