

## **ELEC2246 - Advanced Electronics**

Credits:	2 (1/1/0)
Description:	This course provides theory, operation and practical applications of various field-effect transistors, thyristors, photosensitive devices, sensing devices and wave chopping circuitry.
Prerequisites:	• ELEC2211
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol> <li>Demonstrate safe work practices.</li> <li>Describe variety of sensors and instruments.</li> <li>Demonstrate proper use of sensors and instruments.</li> <li>Describe open/closed loop control.</li> <li>Describe proportional-integral-derivative (PID) control.</li> <li>Use calculations to properly calibrate instruments.</li> <li>Demonstrate ability to calibrate instruments.</li> </ol>
MnTC goal areas:	None

<sup>\*</sup>Can be taking as a Prerequisite or Corequisite.
