

## MCDD2254 - Computer Numerical Control

Credits:	2 (1/1/0)
Description:	This course develops the student's knowledge of computer numerical control components, machines, and basic programming codes and functions.
Prerequisites:	<ul style="list-style-type: none"> <li>• CADD1000</li> </ul>
Corequisites:	
Pre/Corequisites*:	
Competencies:	<ol style="list-style-type: none"> <li>1. Interpret machine movements in the X, Y and Z planes.</li> <li>2. Analyze point-to-point and continuous path programming.</li> <li>3. Utilize incremental and absolute programming modes.</li> <li>4. Write linear interpolation programs for part toolpathing,</li> <li>5. Write circular interpolation programs for part toolpathing,</li> <li>6. Utilize virtual numerical control software to analyze programs for functionality.</li> </ol>
MnTC goal areas:	None

\*Can be taking as a Prerequisite or Corequisite.
