

AGRIBUSINESS

ASSOCIATE OF APPLIED SCIENCE (AAS) - 60 CREDITS

About this program

This program includes courses in all major areas of agribusiness, including management, marketing, agronomy, animal science, precision agriculture and business analysis. The program prepares students to work in agricultural businesses at the technical, sales or managerial level. The program also prepares students to be engaged in a farming operation and learn to make sound management decisions based on financial analysis and production information.

Program outcomes

1. Describe basic professional and ethical practices in agriculture.
2. Develop skills to manage projects and business resources in an agribusiness operation.
3. Learn effective oral and written communication in a business setting.
4. Understand the general principles of the livestock industry.
5. Understand the principles and practices of plant and related sciences as applied to field crops.
6. Understand and apply agribusiness management, including marketing, financial analysis and economics.
7. Use computer software and hardware tools for problem-solving and decision-making.
8. Use critical thinking skills to evaluate the implications of management decisions.

Curriculum overview

Crds	Requirement type
42	Required courses
12	Restricted electives in courses
6	Restricted electives in course types
60	Total

Developmental courses note: A student may be required to enroll in developmental courses in reading, writing and math. A student's scores on the Accuplacer assessment will determine enrollment in developmental courses. The purpose of developmental courses is to prepare students for the demands of a college-level curriculum. *Credits may vary.*

Accreditation: Minnesota State Community and Technical College is accredited by the Higher Learning Commission, a regional accreditation agency recognized by the U.S. Department of Education. Course summaries

ACCT1124 - Spreadsheet Applications (3 credits)

This course provides students with in-depth coverage of a spreadsheet application as used in a business setting. Students should be familiar with Windows and word processing.

Prerequisites:

- BUS1100

ACCT2211 - Financial Accounting I (3 credits)

This course introduces students to the content and concepts underlying financial statements. Course content includes study of the accounting model, financial statements, merchandise accounting, internal controls and accounting for assets. The course will focus on using accounting information for decision making.

AGRI1100 - Principles of Agronomy (3 credits)

This course explores the principles and practices of plant and related sciences as applied to increasing productivity and improvement of field crops. Emphasis is on crop selection and improvement through the breeding of crop varieties, seeds and seedlings, crop growth and development, crop production hazards, and the harvest and storage of field crops.

AGRI1170 - Introduction to Agribusiness (3 credits)

This course is an introduction to the economic environment of the agribusiness sectors of our economy. The course examines the role agriculture plays in the U.S. and global economies. Concepts to be examined include but are not limited to management of agribusiness, marketing of agribusiness, finance of agribusiness and government involvement in agriculture and agribusiness.

AGRI1200 - Introduction to Animal Science (3 credits)

This course provides an introduction to animal science, with an emphasis on physiology, nutrition, animal breeding and management as applied to beef cattle, dairy cattle, poultry, sheep and swine production.

AGRI1300 - Introduction to Precision Agriculture (3 credits)

In this course, students study the theory and principles of precision agriculture equipment, become familiar with the Global Positioning System (GPS) and develop a working knowledge of variable rate systems. Students gain a general overview of current and emerging technologies in precision agriculture as they relate to farm operations and production agriculture.

AGRI2100 - Agricultural Commodity Marketing (3 credits)

This course acquaints students with an understanding of market forces and their relationship to price establishment of agricultural crops, organization of markets, marketing policy and price trends of agricultural commodities.

Prerequisites:

- BUS2206

AGRI2200 - Principles of Farm and Ranch Management (3 credits)

This course emphasizes utilization of land, labor, capital and management in the organization and operation of a farm, and includes the decision-making processes involved in establishing a farm business. Analyzing, budgeting, and using principles of economics are considered in decision-making.

Prerequisites:

- ACCT2211
- BUS2204

AGRI2300 - Farm Records and Business Analysis (3 credits)

This course introduces the business of agriculture and computerized record keeping. This is an applied course of record keeping and financial statements. Students will utilize computerized records (cash and accrual accounting), manage inventories and generate financial documents. Topics include calculation of earnings, efficiency factors, total business and enterprise analysis.

Prerequisites:

- ACCT2211

BUS1100 - Business Computers (3 credits)

Students will utilize business computer software applications including word processing, spreadsheets, databases and presentation software to solve business problems, emphasizing professional design and organization. Additional topics include basic computer hardware, computer security and ethics, privacy concerns and professional communication standards.

BUS1141 - Introduction to Business (3 credits)
 This course offers a broad overview of the business world for both business and non-business majors. It is an introduction to the business environment, business ownership, management, marketing, technology and information, human resources, accounting and legal studies. This course introduces students to the concepts and knowledge of key business functions within the context of the global economy. This class will provide a foundation for other business courses and help students discover their career path while learning the fundamentals of business.

BUS2204 - Principles of Management (3 credits)
 This course examines the historical and philosophical foundations of management as well as current theory and practices. Managerial decisions as a planner, organizer, motivator, controller and leader of a diverse workforce in a competitive environment are identified and evaluated. The course is a study of the basic principles of business management, including the functional, scientific, behavioral and systems approaches along with the role of projects in contemporary organizations. Current literature, concepts, models and applications may be included as well as the use of case studies.

BUS2206 - Principles of Marketing (3 credits)
 This course examines the business function of marketing and will enhance students' decision-making skills in a global market. The course focuses on how marketers create value by satisfying customer needs and wants by analyzing which target markets the organization can best serve, and the appropriate strategies to serve these markets. This course will also discuss the implications of environmental factors (including the digital environment) that can impact the marketing strategies of a business. Topics include business and consumer markets, branding and product strategies, marketing research, digital marketing concepts, pricing, promotion and supply chain management.

ENGL1101 - College Writing (3 credits)
 Meets MnTC Goal Area 1. This is an introductory writing course designed to prepare students for later college and career writing. The course focuses on developing fluency through a process approach, with particular emphasis on revision. Students will consider purpose and audience, read and discuss writing and further develop their own writing processes through successive revisions to produce polished drafts. Course work will include an introduction to argumentative writing, writing from academic sources and a short research project.

Prerequisites:

- Completion of ELL1080, ENGL0096, or ENGL0097 with a grade of C or higher OR placement into college-level English.

ACCT2212 - Financial Accounting II (3 credits)
 This course continues the introduction to the content and concepts underlying basic financial statements. Major content includes income measurement, accrual accounting, accounting theory, time-value of money, accounting for current and long-term liabilities, owner's equity for sole proprietorships, partnerships and corporations, statement of cash flows and financial statement analysis.

ACCT2218 - QuickBooks (2 credits)
 This course is an introduction to computerized accounting applications and software used in the business environment. Topics may include general ledger accounting, payroll procedures, accounts receivable, accounts payable, inventory and depreciation.

BUS1300 - Financial Statement Analysis (3 credits)
 This course covers principles used in analyzing financial statements and budgets. Students learn how to prepare, read and analyze financial statements. Topics include analysis of income statements, balance sheets, flow of funds, risk, obtaining and spreading statements, cash flow projections, capital accounts and financial ratios.

BUS2150 - Legal Environment of Business (3 credits)
 This course offers an overview of the American legal system and provides an introduction to what a business person should know about the law and the American legal system. Major content areas include the court system, trial process, alternative dispute resolution, business and the Constitution, the administrative process, torts and product liability, common law of contracts, employment law, employment discrimination, anti-trust law, international business and ethics.

BUS2500 - Business Internship (3 credits)
 This internship course is designed to provide the student with a purposeful occupational experience in a business environment related to his or her program of study. A learning plan is created for each student in conjunction with the business site to provide experience related to the skills and knowledge acquired in the program. Each internship is an individualized experience; therefore, this course offers a flexible, variable credit experience: The student may choose from 1, 2 or 3 credits, depending on the number of hours pre-arranged with the internship site supervisor. Each credit will require 45 hours of on-the-job learning.

MGMT2225 - Project Management (3 credits)
 This course provides an introduction to all aspects of project management including the technical, cultural and interpersonal skills necessary to manage projects from initiation to completion. The course identifies the process groups and knowledge area of the PMBOK Â® (Project Management Body of Knowledge) guide. Topics include the strategic role of projects in contemporary organizations, working with stakeholders (customers, vendors, organizational cultures) and the technical management tools available for time management, schedules and costs, risks and project completion.

MKTG1106 - Professional Selling (3 credits)
 This course covers a fundamental sales approach that can be used as a foundation for future sales courses. The content covers steps used to plan a sales presentation and methods of determining and filling prospect needs or wants.

MKTG2236 - Small Business Management (3 credits)

This course provides a summary of many of the major issues faced by anyone starting a small business. The course teaches the fundamentals of small business management by blending basic management principles with tested and proven real world techniques for planning, organizing and operating a small business successfully. The course utilizes a variety of learning tools including the textbook, PowerPoint, lectures, written assignments, cases, websites and hands-on activities.

ECON2210 - Macroeconomics (3 credits)

This course provides the student with a means to study economic principles as they relate to determinants of national income, national income accounting, business cycles, unemployment, inflation and aggregate expenditures. The course also examines macroeconomic policy and provides information to gain further understanding in the areas of fiscal policy, financial markets, money and banking, monetary policy, international policy and the varying viewpoints that have evolved throughout history, including the Keynesian and Monetarist schools of thought.

ECON2222 - Microeconomics (3 credits)

Microeconomics stresses the concepts of scarcity, production possibilities, supply and demand curves, elastic and inelastic goods and services, competition, monopolies, oligopolies, poverty and income distribution in the United States. In general, microeconomics examines the functioning of individual industries and the behavior of the individual.

COMM1120 - Introduction to Public Speaking (3 credits)

Meets MnTC Goal Area 1. This course clarifies the process of oral communication, clarifies the basic principles of public speaking and allows the student to increase the application of these principles while both speaking and listening.

COMM1140 - Interpersonal Communication (3 credits)

Meets MnTC Goal Area 1. This course will focus on improving students' abilities to communicate effectively in one-to-one dyadic encounters by providing experience-based instruction. Extensive in-class and out-of-class analyses allow the student to examine his/her own and others' informal social interactions. The long-term goal is for the student to apply interpersonal communication theories to daily interactions and draw his/her own conclusions about the effectiveness of interpersonal communication.
